

8th NHG ANNUAL SCIENTIFIC CONGRESS 2009

presents

Geriatric Medicine

Evolving Model Of Care In Geriatrics

17 October 2009 | 0830 - 1000 hours | MR303 - 304, Level 3 Suntec Convention Centre

Synopsis

Many countries in Asia is facing a problem of greying population. The increase in comorbidities and challenges in physical functioning and mental capacities pose a strain on both the healthcare system, as well as the consumers, who need to navigate through the complexities of the current care models. There are efforts in recent years in the right siting of care for patients. This will be more important as our population ages. The traditional care model will have to evolve to accommodate these new challenges.
